 THE CENTER FOR THE HISTORY OF COLLECTING at THE FRICK COLLECTION

**COLLECTING SPANISH ART:  
 SPAIN'S GOLDEN AGE AND AMERICA'S GILDED AGE**

Ed. by Inge Reist and José Luis Colomer

Spanish art and culture generated tremendous and sustained excitement in the United States during the period from approximately 1870 to 1930. This book explores why and how some of America's greatest art collectors, including Isabella Stewart Gardner, Henry Clay Frick, Charles Deering, Archer Huntington, William Randolph Hearst, and Algur Meadows, turned to the art of Spain to expand and enrich their collections. The authors examine in lively detail the formation of the taste for Spanish art that grew from travel and visits to world fairs as well as the roles played by contemporary artists, dealers and advisors who were so influential in importing Spanish works of art to the United States to fuel the growth of so many private and later public American collections.
